

The journey from BIAB to the ADS Library

16th February 2017
Digital Past, Newport

Jo Gilham, HERALD/BIAB Project Manager

What is the ADS Library

Bringing together a mixture of textual resources for archaeology from different sources with links through to online versions of the text where available.

Not just BIAB...

british and irish archaeological bibliography

Home | About | Search | Browse | News | Contact | Help

The primary research resource for British & Irish archaeology

The British & Irish Archaeological Bibliography is now biab online.

biab online exists to support research work of all kinds. It provides bibliographic references - many with abstracts - covering all aspects of archaeology and the historic environment, and every chronological period, with a geographical focus on Britain and Ireland. There are almost 200,000 references from over three centuries of scholarship - with over 1,500 new records added each year. The biab online service now includes:

- User accounts & saved search results facilities
- Export of search results in html, pdf or BibTex format
- Over 55,000 grey literature references from England's Archaeological Investigations Project (AIP)

biab online coverage provides references to: online & hard-copy publications; local, regional, national & international publications; books, articles, conference proceedings & grey literature. It is a service of the Council for British Archaeology, run with the support of all major historic environment sector organisations from UK and Ireland.

You can find out how to get involved in archaeology across the UK by joining the [Council for British Archaeology](#). Please note that biab online does not cover literature aimed at primary and secondary school age, for more information on resources for 8-16 year olds see the CBA's [Young Archaeologists' Club](#). You can also see the new [Campaign to save YAC](#) page for details of how you can help to save YAC's branch network.

What else will the library do?

- Allow users to add tags and comments to records
- Allow volunteers to add, edit and clean records
- Each record in the library will have a direct URL so that it can be included in external databases
- There will be direct links to resources where they are available online via DOIs
